SKILLS

Development	Python, Java, JavaScript/TypeScript, React, Node.js/Express, HTML, CSS, PostgreSQL, Chrome Extensions (Manifest V3)
AI & APIs	xAI Grok API, ElevenLabs API, OpenAI API, REST APIs, JSON, Prompt Engineering
Tools	Git, GitHub (Actions, Pages), Cursor
Relevant Coursework	Data Structures & Algorithms, Computer Systems, Formal Methods & Models, Object-Oriented Programming
IT Support	Help Desk & Desktop Support, Ticketing Systems, PC Hardware & Peripherals, Windows 10/11, BIOS/UEFI
Networking & Infra	TCP/IP, Subnetting, VLANs, OPNsense Firewall, Proxmox Virtualization, VPN, Linux/Windows Server Admin
Apple Ecosystem	macOS, iOS, iPadOS, Apple Hardware

PROJECTS

YPINR — Developer & Co-Founder | 4-Person Team · **Top 10 of 100 · Best ElevenLabs AI Award** | HopHacks 2026, Johns Hopkins

- Co-founded and built an AI scam-prevention platform detecting scam calls and messages, backed by a public encyclopedia of **30+ scam methods**; live at yourprinceisnotreal.net.
- Integrated **2 third-party AI APIs** — ElevenLabs (AI-cloned voice scoring) and xAI Grok (voice transcription + Grok-4 JSON classification) — to identify scam type, confidence, and method in real time.
- Built an on-device Chrome extension (Manifest V3) flagging risky text across **5 social media platforms** with zero data uploaded off-device; awaiting Chrome Web Store verification.
- Built Python/Postgres backend with TF-IDF retrieval over **100+ indexed scam records**.
- Developed React/Vite frontend with automated deployment through GitHub Actions.

Networking Home Lab | Personal Infrastructure Project

- Repurposed an old HP computer as a home server running **Proxmox** virtualization, hosting a Linux server VM with headless management and secure remote access over VPN.
- Segmented the network with **VLANs** on a managed switch and configured an **OPNsense** firewall/VPN to control traffic between segments and protect the network.

AI Inventory Management App

- Built a full-stack inventory tool with **React, Node/Express, and PostgreSQL** that uses the **OpenAI vision API** to scan photos of products and add them to a store's existing inventory.
- Included an editable quantity field and an AI-generated short item description, designed for mom-and-pop shops that want simple inventory management.

EXPERIENCE

Geek Squad IT Support | Best Buy, Fairfax, VA

Jan 2026 – Present

- Diagnose and resolve hardware, OS, peripheral, and network connectivity issues across a wide range of computers and consumer devices, handling **~10 tickets per day**.
- Set up and configure Windows and macOS devices, translating technical issues into clear guidance for non-technical customers.
- Log diagnostics and resolutions in the ticketing system while managing service requests in a fast-paced, customer-facing environment.

Apple Representative | Best Buy, Fairfax, VA

Apr 2025 – Dec 2025

- Advised ~35 customers per shift on device compatibility, setup, and configuration across Mac, iPhone, iPad, and Apple Watch, resolving basic troubleshooting on the spot and translating technical features into plain-language recommendations for customers of all technical levels.

AWARDS & ACTIVITIES

- Dean's List (2024), Cum Laude | Northern Virginia Community College
- ADAMS Center Mosque, Volunteer: Prepared and maintained prayer areas in support of Ramadan services.

EDUCATION

George Mason University | Fairfax, VA

Expected May 2027

B.S. in Computer Science

Northern Virginia Community College | Annandale, VA

April 2024

A.S. in Computer Science
